Therefore, today we will talk about how to enable/disable macros in your Excel Macro is very effective in dealing with complex tasks.. Start Excel Application > Go to File > Recent Hold Shift key and double click to open.. However, there will also be dangers in some macro-enabled workbooks If you run those macros unintentionally, your Excel could be damaged.

2. [excel open workbook disable macros](#)
3. [excel 2016 disable macros on open](#)

Doing this will prevent the Workbook_Open event from firing and the Auto_Open macro from running.. And in Excel, there are two methods to do this Below are the steps about those two different methods.. Or hold shift key and double click to open the Workbook The security of macro is a key element for the security of Excel.. Hence, correctly enabling/disabling macros macro is rather important Open the Macro Settings Dialog Before you modify the settings, you need to open the macro settings window.
